

This is the General Service List created by John Bauman.

This has been downloaded from <http://jbauman.com/gsl.html>.

The first number is the frequency of the word in the General Service List. So, number 1 is the most common word. The second number is how often this word appeared when the list was created. You can ignore this word.

I suggest you read through the list, and circle words you are not sure about. Then, spend time learning these. We will put up various activities that will help you with this later.
